

EPVS

Egg Production Verification System

ALS Collections Manual

Levy invoicing, reconciliation and reporting

Audience: ALS Collections team

Edition April 2026

ALS Food Safety Agency

All amounts throughout EPVS are shown EXCLUSIVE of VAT.

Table of Contents

This document uses a Word Table of Contents. To fill it in, right-click below and choose "Update Field" (or press F9). All headings you see through the guide are included.

Right-click and choose "Update Field" to build the Table of Contents.

About EPVS

IN THIS SECTION *What the platform is, who uses it, and where you fit in.*

EPVS manages the statutory levy owed on graded eggs, pulp, and egg powder across every registered facility. Facilities submit monthly EPVs, inspectors verify them, and ALS invoices and reconciles payment. This manual walks through everything the current role can do.

The five moving parts:

- Facilities submit their monthly EPV.
- Inspectors approve or capture a revised set of figures.
- ALS invoices and records payment.
- Administrators and Super Admins oversee the whole cycle.
- The system does the arithmetic, schedules issuance, and logs everything.

Logging in and getting oriented

IN THIS SECTION *What you see the moment you log in.*

You land directly on the ALS Collections page. It is your primary worksurface. The top ribbon also shows Company Overview (read-only across facilities), Support, and your own Settings.

NOTE Only ALS users and Super Administrators can access the ALS Collections page. Every other role is redirected elsewhere on login.

The ALS Collections page

IN THIS SECTION *What appears here, and why nothing else does.*

What appears in the worklist

Only EPVs that have been inspection-cleared appear. An EPV shows up in one of two states:

State	What it means	Invoice amount
Approved	Inspector approved the facility's submitted figures.	Facility's Egg + Pulp + Powder levies.
Rejected → Insp	Inspector rejected the facility's figures and captured a revised set.	Inspector's Egg + Pulp + Powder levies.

TIP EPVs still waiting on the inspector are deliberately hidden — you only see EPVs you can act on today.

The KPI ribbon

KPI	Meaning
Invoiceable	Total EPVs waiting to be invoiced.
Invoices Sent	How many have been marked "sent".
Reconciled	How many have been marked as paid.
Total Billable	What you should collect for the filter.
Total Collected	What has been received (matches ReconciledAmount).
Outstanding	Billable – Collected.
Collection Rate	Collected / Billable as a percentage.

Filtering the worklist

IN THIS SECTION *Slicing the list to focus on what matters right now.*

The filter bar above the table gives you six controls:

- Free-text search — facility name, account code, or reference number.
- Year and Month — restrict to a specific period.
- Approvals — Approved only, Rejected only, or All.
- Invoices — Sent, Not sent, or All.
- Payments — Reconciled, Unreconciled, or All.

The KPI ribbon and the Excel export both honour whatever filters you have on.

The expanded row

IN THIS SECTION *Click any row to reveal the full worksurface for that EPV.*

The expanded panel has four columns:

Amount breakdown

Facility figures, Inspector figures (if any), and the resolved invoice amount. If the inspector rejected the facility, this is where you see both sets of numbers side by side.

ALS invoice PDF

Upload, view, or remove your invoice. PDF / PNG / JPG, up to 15 MB. Uploading a new file replaces the previous one. Removed files are deleted from disk immediately.

Payment

Amount owed at the top. Below: link to the facility POP if they uploaded one, then the reconcile controls (amount received + Mark paid button).

ALS comment

Free text, visible to ALS and Super Admins. Use it as your working log for the EPV — chase reminders, call notes, escalation status.

Marking an invoice as sent

IN THIS SECTION *When you've dispatched the invoice from your billing system.*

Tick the "Invoice Sent" checkbox on the row. The system records the timestamp and who marked it. The facility sees a "Levy Invoice from ALS" panel appear inside their Company Overview the moment you upload the PDF (below).

Uploading your invoice PDF

IN THIS SECTION *Making the invoice visible to the facility.*

1. Expand the EPV row.
2. Click "Upload invoice" in the ALS invoice PDF column.
3. Pick a PDF, PNG, or JPG up to 15 MB.
4. The uploaded file is visible immediately in the row (View link) and inside the facility's Company Overview.

TIP Use consistent file naming — e.g. "ALS-INV-{ref}.pdf". Makes reconciliation later much easier for both sides.

Reconciling a payment

IN THIS SECTION *When money lands and needs to be matched to an EPV.*

Reconciliation writes to the shared reconciled fields the whole system already uses — nothing lives in an ALS-only silo. Once you reconcile, the Dashboard, Administrators tab, and Company Overview all reflect it automatically.

A full payment

1. Expand the row.
2. The amount received input pre-fills with the invoice amount.
3. Click "Mark paid".
4. Outstanding drops to R 0.00. The row highlights green.

A short pay

1. Expand the row.
2. Type the actual amount received (e.g. 800 for an R 1000 invoice).
3. Click "Mark paid" — the row is reconciled but Outstanding shows R 200.
4. Follow up with the facility for the balance. Add a comment on the row so the reason is on the record.

Reverting a reconciliation

If you reconciled in error, click "Clear" to reset. Reconciled amount and the audit stamps clear together.

TIP If the facility uploaded their POP, click "View POP" first to confirm the amount before reconciling.

The transparency history

IN THIS SECTION *A shared audit trail with Super Admins.*

Every action in this page is logged for both Super Admins and ALS to see. The bottom of every expanded row shows a "History · transparency log" table.

Column	Meaning
When	Timestamp of the action.
Action	Invoice Sent, Invoice Uploaded, Reconciled Payment, or Comment.
From	Value before the action.
To	Value after the action.
By	Who did it, with a role badge — green for ALS, indigo for Super Admin.

NOTE The log is shared. Super Admins can see what ALS has done and vice versa. Nothing is hidden between the two sides — that's intentional.

Exporting to Excel

IN THIS SECTION *Getting the worklist out for offline analysis or hand-off.*

The Export to Excel button downloads the current filtered view. Filename pattern:

ALS Collections Report - {Month YYYY if filtered} - YYYY-MM-DD.xlsx

Every column visible in the table is included, plus:

- Facility vs Inspector breakdown per levy (egg, pulp, powder).
- POP uploaded flag.
- Amount paid and outstanding.
- Your ALS comment for the row.

Company Overview

IN THIS SECTION *Read-only cross-facility.*

Use it when a facility asks you a question — you can quickly see their EPV history, payment status, and any comments the inspection team has left. You cannot edit facility data or capture EPVs from here.

Common workflows

IN THIS SECTION *The tasks you do most.*

Sending the monthly invoices

1. ALS Collections → filter to this month's invoiceable set.
2. Generate the invoice from your billing system for each row.
3. Upload the invoice PDF on the row.
4. Tick "Invoice Sent" — the facility now sees it in their Company Overview.

Weekly reconciliation

1. Filter to Reconciled = No, Invoice Sent = Yes.
2. Cross-reference the bank feed / receipts against outstanding invoices.
3. Enter each amount received and tick "Mark paid".
4. Add a comment for anything unusual (short pay, part payment, EFT reference mismatch).

Monthly close

1. Filter to the closing month.
2. Export to Excel. Save it for records.
3. Review the KPI ribbon — Collection Rate for the period should be greater than 90%.

Troubleshooting

IN THIS SECTION *When something looks off.*

Symptom	Likely cause	What to try
A completed EPV isn't appearing here.	The inspector hasn't approved or rejected it yet.	Ask the inspection team to review. Only inspection-cleared EPVs appear.
Invoice amount seems too low.	The inspector rejected and reduced the figures.	Expand the row — "Rejected → Insp" appears in the Approval column. The Inspector figures are shown alongside the facility's.
Facility says they never got the invoice.	Their four email addresses may be out of date.	Company Overview → confirm addresses. If correct, ask an Administrator to check EmailSendLog.
Upload fails with "file too large".	The invoice PDF is over 15 MB.	Compress the PDF (any online tool works). 15 MB is the platform-wide cap.

Getting help

IN THIS SECTION *Where to reach out when something isn't working, and where to look for answers on your own.*

Inside EPVS

Every page has a Support link in the top ribbon and a floating help button in the bottom-right corner. Click either to raise a ticket. Support tickets are triaged by category (Access, EPV Submission, Payment, Dashboard, Company & Facility, or General) and priority (Low, Medium, High, Urgent).

You will get email updates as your ticket moves through Open → In Progress → Resolved. Follow-up comments can be added on the ticket at any time.

The User Manual button

The "User Manual" button in the top ribbon downloads this guide as a PDF at any time. Useful for offline reading, printing, or forwarding to a colleague.

Glossary

IN THIS SECTION *The vocabulary this manual uses.*

Term	Meaning
EPV	Egg Production Verification — the monthly declaration each facility submits.
Levy	Statutory levy owed on eggs, pulp, and powder sold to trade.
Facility	A registered producer, packer, or breaking-plant on the system.
ALS	The 3rd-party levy collector (previously called "Super" in older releases).
Inspector	ALS Food Safety Agency staff who verify facility EPVs.
Reconciled	A payment has been received and matched to an EPV.
POP	Proof of Payment — the bank confirmation the facility uploads after paying.
On EPV Cycle	A facility that receives the monthly EPV email automatically.
Verified (badge)	A facility whose Company Admin has completed the onboarding wizard.

How the levy is calculated

IN THIS SECTION *The maths behind every invoice. Trade sales are what count. All amounts exclude VAT.*

EXCL. VAT ALL Rand amounts anywhere in EPVS are stored and displayed EXCLUSIVE of VAT. The statutory levy is calculated on the pre-VAT sales-to-trade quantities. VAT is added separately by ALS on the invoice they send you.

Product	Basis	Rate (excl VAT)	Formula
Eggs	Dozens sold to trade	R 0.020 / dozen	$\text{SoldToTrade} \times 0.020$
Pulp	kg sold to trade → dozens at 1.7	R 0.020 / dozen (R 0.034 / kg)	$\text{PulpSoldToTrade} \times 1.7 \times 0.020$
Powder	kg sold to trade	R 0.020 / kg	$\text{PowderSoldToTrade} \times 0.020$

These fields are recorded so your closing stock balances, but they DO NOT contribute to the levy: sales to staff, sales through a farm stall, transfers to other producers, pulp / powder sold to other producers, market returns, machine loss, sent-to-pulp, destroyed, exported, and conversion loss.
