About EPVS

IN THIS SECTION *What the platform is, who uses it, and where you fit in.*

EPVS manages the statutory levy owed on graded eggs, pulp, and egg powder across every registered facility. Facilities submit monthly EPVs, inspectors verify them, and ALS invoices and reconciles payment. This manual walks through everything the current role can do.

The five moving parts:

- Facilities submit their monthly EPV.
- Inspectors approve or capture a revised set of figures.
- ALS invoices and records payment.
- Administrators and Super Admins oversee the whole cycle.
- The system does the arithmetic, schedules issuance, and logs everything.

Logging in and getting oriented

IN THIS SECTION *What you see the moment you log in as an Administrator.*

Administrators land on the Dashboard. Seven tabs are available.

Tab	Purpose
Dashboard	KPI ribbon, financial charts, province overview.
Clients	Consolidated Master Facility Database (CRUD + audit).
Inspectors	Inspector workload and allocation.
Administrators	Reconciliation control centre — where you spend most of your day.
Company Overview	Deep-dive per facility.
Support	Support tickets across the system.
User Management	Add / edit / deactivate users; login history.

NOTE ALS Collections is restricted to ALS staff and Super Administrators. You will not see that tab.

Consolidated Master Facility Database

IN THIS SECTION *Add and manage facilities.*

You have the same abilities as Super Administrators here — add, edit, delete facilities; send EPVs; export.

Badges

Badge	Meaning
Verified	Company Admin has completed the onboarding wizard.
On EPV Cycle	Facility is on the monthly auto-send schedule.

Export to Excel

The Export to Excel button downloads the current search view, including contact details, verified status, cycle status, and assigned inspector. Filename: `Consolidated Master Facility Database - YYYY-MM-DD.xlsx`.

Company Overview

IN THIS SECTION *One facility at a time.*

From the EPV list you can Resend the Pending email, mark manual reconciliation, and view any invoice ALS has uploaded to the facility.

The Change Log shows every action against this facility for full accountability.

Dashboard

IN THIS SECTION *Your single-glance view.*

Filterable by Year / Quarter / Month. Every widget follows the filter.

The KPIs to watch

KPI	Why it matters
Completed EPVs	Volume of monthly submissions received.
Verified	How many are ready for invoicing by ALS.
Rejections	Where the inspection process caught issues.
Outstanding	Facilities that missed a submission this period.
Collection Rate	How much of what was billed has actually been paid.

Administrators (reconciliation)

IN THIS SECTION *Your daily worksurface.*

Every completed EPV appears here with its POP, reconciled status, and amount. Use it to reconcile in batches when payment files arrive.

A typical reconciliation session

1. Download the bank statement CSV.
2. On Administrators, sort by POP Uploaded date descending.
3. Match each bank line to an EPV by reference number or amount.
4. Tick Reconciled and enter the amount received.
5. Short pays — enter what was actually received. Outstanding stays visible on the Dashboard.

TIP Use Company Overview to view the POP inline before reconciling. This helps confirm the reference on the bank statement matches the EPV.

Inspectors

IN THIS SECTION *Assign, monitor, and support the inspection team.*

View inspector workload, KPIs, and progress. Assign inspectors to facilities so incoming EPVs land in the right queue.

Super Admins can also be selected as inspectors for coverage — treat that as a stop-gap rather than a permanent assignment.

User Management

IN THIS SECTION *Managing internal users.*

Add and manage internal users — Inspectors, other Administrators. Reset passwords and deactivate accounts. The Login History button shows every authentication attempt for audit.

Common workflows

IN THIS SECTION *The tasks you do most.*

Onboarding a facility

1. Master Facility Database → + Add New.
2. Fill Business Name + as many contacts as you have.
3. Invite the Company Admin.
4. When they finish onboarding, click Send EPV.

End-of-day reconciliation

Filter Administrators for today's payments. Confirm each is reconciled. Escalate mismatches via a Support ticket.

Getting help

IN THIS SECTION *Where to reach out when something isn't working, and where to look for answers on your own.*

Inside EPVS

Every page has a Support link in the top ribbon and a floating help button in the bottom-right corner. Click either to raise a ticket. Support tickets are triaged by category (Access, EPV Submission, Payment, Dashboard, Company & Facility, or General) and priority (Low, Medium, High, Urgent).

You will get email updates as your ticket moves through Open → In Progress → Resolved. Follow-up comments can be added on the ticket at any time.

The User Manual button

The "User Manual" button in the top ribbon downloads this guide as a PDF at any time. Useful for offline reading, printing, or forwarding to a colleague.

Glossary

IN THIS SECTION *The vocabulary this manual uses.*

Term	Meaning
EPV	Egg Production Verification — the monthly declaration each facility submits.
Levy	Statutory levy owed on eggs, pulp, and powder sold to trade.
Facility	A registered producer, packer, or breaking-plant on the system.
ALS	The 3rd-party levy collector (previously called "Super" in older releases).
Inspector	ALS Food Safety Agency staff who verify facility EPVs.
Reconciled	A payment has been received and matched to an EPV.
POP	Proof of Payment — the bank confirmation the facility uploads after paying.
On EPV Cycle	A facility that receives the monthly EPV email automatically.
Verified (badge)	A facility whose Company Admin has completed the onboarding wizard.

How the levy is calculated

IN THIS SECTION *The maths behind every invoice. Trade sales are what count. All amounts exclude VAT.*

EXCL. VAT ALL Rand amounts anywhere in EPVS are stored and displayed EXCLUSIVE of VAT. The statutory levy is calculated on the pre-VAT sales-to-trade quantities. VAT is added separately by ALS on the invoice they send you.

Product	Basis	Rate (excl VAT)	Formula
Eggs	Dozens sold to trade	R 0.020 / dozen	$\text{SoldToTrade} \times 0.020$
Pulp	kg sold to trade → dozens at 1.7	R 0.020 / dozen (R 0.034 / kg)	$\text{PulpSoldToTrade} \times 1.7 \times 0.020$
Powder	kg sold to trade	R 0.020 / kg	$\text{PowderSoldToTrade} \times 0.020$

These fields are recorded so your closing stock balances, but they DO NOT contribute to the levy: sales to staff, sales through a farm stall, transfers to other producers, pulp / powder sold to other producers, market returns, machine loss, sent-to-pulp, destroyed, exported, and conversion loss.
