15. Troubleshooting & FAQ

1. Getting Started

1.1 Logging In

1. Open your browser and navigate to the EPVS application URL.
2. Enter your email address and password on the login page.
3. Click "Sign In".
4. You will be redirected to the Inspector Dashboard.

Tip: If you have forgotten your password, contact your Admin or Super Admin to reset it for you.

1.2 Navigation

As an Inspector, your navigation is focused on your primary responsibilities. The navigation bar at the top of the page provides access to:

Menu Item	Description
Inspectors	Your main workspace — EPV verification, facility visits, outstanding payments, and performance KPIs
Company Overview	View detailed information about any company in your province
Support	View and manage support tickets

Your name, assigned province, and role badge ("Inspector") are displayed in the page header.

2. Your Role: What Inspectors Can and Cannot Do

2.1 What You Can Do

- View the Inspector Dashboard filtered to your assigned province.
- Review completed client EPVs and verify the production figures.
- Approve EPVs that are correct — marking them as verified.
- Reject EPVs with incorrect figures — creating an Inspector EPV with the correct amounts.
- Complete Inspector EPV forms after a rejection.
- View facilities in your province that need a physical visit this quarter.
- View facilities with outstanding levy payments.
- View facilities that have not submitted EPVs for months in the current year.
- View any company's details via the Company Overview.
- Submit and view support tickets.

2.2 What You Cannot Do

The following actions are not available to Inspector users:

- **Access the main Dashboard:** The system-wide Dashboard is for Admin and Super Admin only.
- **Access the Administrator Dashboard:** Payment reconciliation is handled by Admins.

- **Manage client records:** Adding, editing, or deleting clients is an Admin function.
- **Send EPV forms:** Only Admin/Super Admin can send EPVs to clients.
- **Manage users:** User creation, editing, and deletion are Admin functions.
- **Reconcile payments:** Financial reconciliation is handled on the Admin Dashboard.
- **Edit KPI targets:** Only the Super Admin can adjust KPI target percentages.
- **View other provinces:** You can only see facilities and EPVs in your assigned province.

Tip: If you need any of these actions performed, contact your Admin or submit a support ticket.

3. Understanding Your Province Assignment

Every Inspector is assigned to one of the nine South African provinces. This assignment controls which data you can see throughout the system.

Province	Province
Eastern Cape	Limpopo
Free State	Mpumalanga
Gauteng	North West
KwaZulu-Natal	Northern Cape
Western Cape	

Your assigned province is displayed in the Inspector Dashboard header next to your name. All data — EPVs, facilities, statistics, charts, and KPIs — is automatically filtered to show only your province.

Note: If your province assignment is incorrect or needs to change, contact the Super Admin. You cannot change it yourself.

If no province has been assigned to you yet, the header will display "No province assigned" and you will not see any facility data. Contact the Admin immediately to have this corrected.

4. Inspector Dashboard Overview

The Inspector Dashboard is your primary workspace. It is divided into several sections:

Page Header

- Title: "Inspector Dashboard"
- Your name, role, and assigned province.

Performance KPIs

- Four KPI gauge cards showing your province's performance against targets.

Action Items & Statistics

- Quick-glance cards showing counts: EPVs needing approval, inspector forms to complete, facilities needing visits, outstanding payments.
- Statistics: total facilities, total EPVs, rejections, inspections done.

Financial Summary

- Total Billed, Total Paid, Outstanding, and Collection Rate for your province.

Five Data Tabs

- Pending Approvals, Inspector EPVs, Facilities Need Visit, Outstanding Payments, Not Completed.

Financial Charts

- Monthly Billed vs Paid bar chart and Egg Levy vs Pulp Levy line chart.

5. Performance KPIs

At the top of the Inspector Dashboard, four KPI cards measure your province's performance:

KPI	What It Measures	Target
Collection — Prior Months	Percentage of total billed amounts that have been paid for past months in your province	80%
Collection — Current Month	Percentage of the current month's billed amount that has been paid in your province	80%
Approvals Actioned	Percentage of completed EPVs that you (or another inspector) have verified	90%
Facilities Visited	Percentage of facilities in your province physically visited this quarter	100%

Understanding the KPI Cards

Each KPI card displays:

- **Current Value:** The actual percentage, displayed as a large number.
- **Target:** The target percentage (e.g., "Target: >=80%").
- **Progress Bar:** A visual bar showing progress. The black marker indicates where the target falls.
- **Status Badge:** "ON TARGET" (green) if the value meets or exceeds the target, or "BELOW TARGET" (red) if it does not.
- **Detail Line:** Additional context (e.g., "R 50,000 of R 100,000" or "15 of 20 facilities").

Colour Coding

- **Green:** Value meets or exceeds the target — good performance.

- **Orange:** Value is approaching the target (within 75%) — needs attention.
- **Red:** Value is significantly below the target — requires immediate action.

Note: KPI targets are set by the Super Admin and apply across all provinces. You cannot change them.

6. Pending Approvals — Reviewing Client EPVs

This is your most important tab. It shows all completed client EPVs in your province that are waiting for your verification.

6.1 When Does an EPV Appear Here?

A client EPV appears in Pending Approvals when ALL of these conditions are met:

- The EPV was submitted by the client (not an inspector copy).
- The client has completed and submitted the form (Status = "Completed").
- No inspector has approved it yet (IsVerified = 0).
- No Inspector EPV has been created for it yet (it has not been rejected).
- The facility is in your assigned province.

Additionally, EPVs that were previously rejected but where the Inspector EPV is still pending will also appear — these need your attention to complete the inspector form.

6.2 What You See in the Table

Column	Description
Business Name	The facility/company name that submitted the EPV
Client ID	Unique identifier for the facility
Reference Number	EPV reference (e.g., EPV-2026-03-0042)
Monthly Levy	The calculated levy amount (Egg Levy + Pulp Levy) in Rands
Status	EPV status badge
Completed Date	When the client submitted the form
Actions	"Approve" and "Reject & Inspect" buttons

Tip: Use the search bar above the table to find a specific EPV by business name, client ID, or reference number. Click any column header to sort.

6.3 Reviewing the EPV

Before approving or rejecting, you should review the production figures. The key items to verify are:

- Opening stock matches the previous month's closing stock.
- Purchases (graded and ungraded eggs) are reasonable for the facility size.
- Deductions (market returns, machine loss, sent to pulp, destroyed) are justified.
- Sales figures (sold to trade, staff, farm stall) align with expected volumes.
- Closing stock calculation is correct (Opening + Purchases - Deductions - Sales - Transfers).

- Actual closing stock matches or is close to the theoretical calculation.
- Pulp figures are consistent (pulp opening, purchased, converted, sold).
- Levy calculations are correct (Egg Levy = Sales x 1.8%, Pulp Levy = Pulp Sold x 1.7 x 1.8%).

7. Approving an EPV

When you have reviewed a client's EPV and the figures are correct, approve it:

1. Find the EPV in the "Pending Approvals" tab.
2. Click the "Approve" button on that row.
3. The system records your name, role, and the current date/time.
4. A success message confirms: "EPV approved successfully."
5. The EPV disappears from your Pending Approvals list.

What Happens After Approval

- The EPV is flagged as Verified (IsVerified = 1).
- It becomes eligible for financial reconciliation on the Administrator Dashboard.
- The "Approvals Actioned" KPI updates to reflect the new verification.
- The client can see the approval status in their Company Overview.

Note: Approval is permanent. Once approved, an EPV cannot be un-approved. If you approve by mistake, contact the Admin.

8. Rejecting an EPV & Completing the Inspector Form

When a client's production figures are incorrect, you must reject the EPV and submit your own corrected version.

8.1 Rejecting the Client EPV

1. Find the EPV in the "Pending Approvals" tab.
2. Click the "Reject & Inspect" button.
3. A confirmation dialog appears — click "Confirm".
4. The system creates a new "Inspector EPV" record linked to the original client EPV.
5. You are redirected to a blank EPV form to fill in the correct figures.

8.2 Completing the Inspector Form

The Inspector EPV form has the same structure as the client form:

- **Step 1 — Business Details:** Pre-filled from the client record. Review and correct if needed.
- **Step 2 — Egg Levy:** Enter the correct production figures:
 - Opening Stock (should match previous month's closing).
 - Purchases (Graded and Ungraded).
 - Deductions (Market Returns, Machine Loss, Sent to Pulp, Destroyed).
 - Sales (Sold to Trade, Sold to Staff, Sold Through Farm Stall).
 - Transfers to Other Producers.
 - Actual Closing Stock.
- **Step 3 — Pulp Levy:** Enter corrected pulp figures: opening stock, purchased, converted, sold to trade, sold to producers.
- **Step 4 — Review & Submit:** Review all figures. Click "Submit" to finalise.

After Submission

- The Inspector EPV is saved with Status = "Completed" and your name recorded.
- The original client EPV remains on file unchanged — for audit purposes.
- Both EPVs (client and inspector) are visible in the Company Overview.

8.3 Completing Previously Rejected EPVs

If you rejected an EPV but didn't complete the inspector form at that time, it will appear under the "Inspector EPVs" tab (Tab 2). Click the row to open the form and complete it.

Note: You must complete all Inspector EPVs. Leaving them pending affects your "Approvals Actioned" KPI.

9. Facilities Needing a Visit

The "Facilities Need Visit" tab shows all facilities in your province that have not had a physical inspection this quarter.

9.1 What You See

Column	Description
Business Name	Facility/company name
Client ID	Unique facility identifier
Town	Location of the facility
Province	Your assigned province
Facility Type	Type of operation

Tip: Use the search bar to filter by facility name, client ID, or town.

9.2 What Counts as a Visit

A facility is marked as "visited" when a physical inspection is recorded in the system (ManualInspection = 1) for the current quarter. The quarter periods are:

- Q1: January — March
- Q2: April — June
- Q3: July — September
- Q4: October — December

Once all facilities in your province have been visited, the "Facilities Visited" KPI will show 100%.

9.3 Planning Your Visits

Use this tab to plan your quarterly inspection schedule. Sort by Town to group nearby facilities and minimise travel time.

10. Outstanding Payments

The "Outstanding Payments" tab shows facilities in your province that have unpaid levy amounts.

10.1 What You See

Column	Description
Business Name	Facility/company name
Client ID	Unique facility identifier
Total Outstanding	Sum of unpaid levy amounts across all EPVs (in Rands)

This data is grouped by facility — if a facility has multiple unpaid EPVs, the amounts are combined into one total.

10.2 Your Role with Outstanding Payments

While you cannot reconcile payments (that is an Admin function), this information is valuable for:

- Following up with facilities during physical visits about payment.
- Identifying repeat offenders who consistently have outstanding amounts.
- Reporting payment issues to Admin via support tickets.

***Tip:** If a facility tells you they have paid, ask them to upload their Proof of Payment (POP) via the Company Overview, or inform the Admin to check.*

11. Not Completed EPVs

The "Not Completed" tab shows facilities in your province that have not submitted a completed EPV for one or more months in the current year.

11.1 What You See

Column	Description
Business Name	Facility/company name
Client ID	Unique facility identifier
Period Month	The month for which the EPV is missing
Province	Facility province

11.2 Using the Month Filter

A dropdown above the table lets you filter by a specific month (1–12). This is useful to see which facilities are missing for a particular reporting period rather than viewing all months at once.

11.3 What to Do

- During facility visits, remind clients to complete outstanding EPVs.
- If a client says they never received the EPV email, report it to Admin so they can resend.
- Submit a support ticket for persistently non-compliant facilities.

12. Financial Summary & Charts

12.1 Financial Summary Panel

Below the tabs, a summary panel shows the financial overview for your province:

- **Total Billed:** Sum of all levy amounts for completed EPVs in your province.
- **Total Paid:** Sum of all reconciled amounts.
- **Outstanding:** Total Billed minus Total Paid — the amount still owed.
- **Collection Rate:** Percentage of billed amounts that have been paid.

12.2 Charts

Two interactive charts are displayed:

Total Billed vs Paid (Bar Chart): Monthly comparison showing blue bars for amounts billed and green bars for amounts paid. Hover over any bar for the exact Rand value.

Egg Levy vs Pulp Levy (Line Chart): Monthly trend lines showing egg levy (teal) and pulp levy (orange). Useful for spotting seasonal patterns or unexpected changes.

13. Support Ticket System

13.1 Creating a Ticket

A floating "Support" button in the bottom-right corner of every page lets you submit tickets for any issue.

1. Click the floating Support button.
2. Select an Issue Type from the grouped dropdown:
 - Account & Access — permission issues, registration problems.
 - EPV & Verification — submission issues, data corrections, status problems.
 - Payment & Reconciliation — payment status, POP uploads, levy queries.
 - Dashboard & Reports — incorrect data, chart issues.
 - Company & Facility — company info updates, province assignments.
 - General — help, feature requests, bugs, performance issues.
3. Enter a Subject (brief title) and optional Description (details).
4. Select Priority: Low, Medium, High, or Urgent.
5. Click "Submit Ticket".

Tip: Use "High" or "Urgent" priority sparingly — only for issues that block your work.

13.2 Viewing Your Tickets

Navigate to the Support page to see all tickets. You can filter by Status, Priority, or Category. Click any ticket to view its details, status updates, and any comments from Admin.

13.3 When to Submit a Ticket

- Your province assignment is wrong or missing.
- You cannot access an EPV that should be in your province.
- A client reports issues with their EPV form link.
- You find data discrepancies that you cannot resolve through approval/rejection.
- System errors or performance issues.
- Feature requests or suggestions for improvement.

14. Step-by-Step Workflows

14.1 Daily Routine

1. Log in and check the Inspector Dashboard.
2. Review the KPI cards — note any that are below target.
3. Check the "Pending Approvals" tab for new EPVs to review.
4. Approve or reject each EPV after reviewing the figures.

5. Check the "Inspector EPVs" tab for any forms you need to complete.
6. Review "Outstanding Payments" for any follow-ups needed.

14.2 Approving a Correct EPV

1. Go to "Pending Approvals" tab.
2. Review the EPV figures (levy amounts, stock figures, etc.).
3. Click "Approve".
4. Confirm the success message.
5. Move to the next EPV.

14.3 Rejecting and Correcting an EPV

1. Go to "Pending Approvals" tab.
2. Review the EPV and identify incorrect figures.
3. Click "Reject & Inspect".
4. Confirm the rejection.
5. Fill in the correct production figures on the Inspector EPV form.
6. Review your entries on Step 4.
7. Submit the form.

14.4 Planning Quarterly Facility Visits

1. At the start of each quarter, go to "Facilities Need Visit" tab.
2. Note the total count — this is your target for the quarter.
3. Sort by Town to group nearby facilities.
4. Plan your visit schedule to cover all facilities before the quarter ends.
5. After each visit, ensure the inspection is recorded in the system.
6. Monitor the "Facilities Visited" KPI — aim for 100%.

14.5 Following Up on Non-Compliant Facilities

1. Check the "Not Completed" tab for facilities missing EPVs.
2. Use the month filter to focus on the most overdue months.
3. During physical visits, remind facilities to complete their EPVs.
4. If a facility reports they didn't receive the email, submit a support ticket so Admin can resend.
5. For persistently non-compliant facilities, escalate via a High-priority support ticket.

15. Troubleshooting & FAQ

Q: I can't see any data on my dashboard.

Check that your province assignment is correct — it's shown in the page header next to your name. If it says "No province assigned", contact the Admin immediately.

Q: A facility in my province doesn't appear in my dashboard.

The facility may not have a province assigned in the master database. Submit a support ticket with the facility name and client ID so Admin can update the record.

Q: I approved an EPV by mistake.

Approval is permanent and cannot be reversed by an Inspector. Contact the Admin or Super Admin immediately to discuss options.

Q: I rejected an EPV but now can't find the inspector form.

Go to the "Inspector EPVs" tab (second tab). The form will be listed there with Status "Pending". Click it to open and complete the form.

Q: A client says their EPV figures are correct but I disagree.

Reject the EPV and complete the Inspector EPV with the figures you believe are correct based on your inspection. Both versions are kept on file for audit. If the dispute continues, submit a support ticket to involve Admin.

Q: The KPI targets seem too high or too low.

KPI targets are set by the Super Admin. If you believe they need adjustment, submit a support ticket explaining your reasoning.

Q: I forgot my password.

Contact your Admin or Super Admin. They can reset your password from the User Management page.

Q: I need to see data from another province.

Inspector access is limited to your assigned province. If you need data from another province, ask the Admin — they can view all provinces.

Q: A facility visit was done but the system doesn't show it.

Ensure the Manual Inspection was recorded in the system. If it wasn't captured, contact Admin to update the record.

Q: How do I know which EPVs are most urgent to review?

Sort the "Pending Approvals" table by "Completed Date" (ascending) — the oldest submissions should be reviewed first. Also check the action item cards at the top for overall counts.

— *End of Manual* —
Generated: 23 March 2026

Recent Updates - April 2026

This section summarises the changes shipped in April 2026. Earlier sections of this manual remain accurate; the items below override or extend them.

EPV period now reflects the previous month

Whenever an EPV is issued (manually from the Consolidated Master Facility Database or Company Overview, or automatically each month), the verification is created for the previous calendar month. Example: an EPV issued in March 2026 captures February 2026 data.

Automatic monthly EPV sending

Once a facility has been placed on the EPV cycle (status 'On EPV Cycle'), the system now automatically issues that facility a fresh EPV at the start of every month covering the previous month's data. The scheduler runs once a day; if the previous-month EPV is already present, nothing is sent. The email goes to all four facility addresses on file (primary, owner, accounts and manager). To take a facility off the cycle, clear its EPVCycleStatus on the Consolidated Master Facility Database page.

Resend EPV email button

The Company Overview window now shows a 'Resend Email' button alongside every Pending EPV. Use it when a facility reports they never received the original notification - it re-sends the same EPV link to all facility email addresses on file. No new EPV record is created and the resend is logged in EmailSendLog.

Facility verified status now visible

The Consolidated Master Facility Database page shows a 'Verified' badge once the facility's invited Company Admin has accepted their invitation and completed the onboarding wizard. A separate 'On EPV Cycle' tag indicates the facility is on the monthly auto-send schedule. The status cell stays empty until one of those two events applies.

EPV form (Eggs page) - new 'Eggs Exported' deduction

Section C (Deductions) now includes 'Eggs Exported'. Like the other deductions, it reduces the theoretical closing stock and does NOT affect the egg levy (only Section D Sales drives the levy).

EPV form (Eggs page) - purchase source detail and attachments

When Graded Eggs Purchased or Ungraded Eggs Purchased is greater than zero, a 'Source & Supplier Detail' comment box opens under Section B together with a file uploader. Facility users and inspectors can describe where and from whom the purchase was made, and attach supporting documents (PDF, PNG, or JPG, up to 15 MB each). Uploaded files appear with a 'Remove' button while the EPV is still editable, and as inline links in the Review section.

EPV form (Pulp page) - 'Conversion Loss' line

Sales & Deductions on the pulp page now has a 'Conversion Loss' row directly below 'Sold to Other Producers'. Conversion loss does NOT contribute to the pulp levy, but it is subtracted from closing pulp stock so the carry-forward stays balanced.

EPV form (Pulp page) - pulp purchase source detail and attachments

When 'Pulp Purchased from Others' is greater than zero, a comment box and uploader appear (same 15 MB limit and PDF/PNG/JPG rules) so the source of the purchased pulp can be recorded and supporting documents attached.

Verifications can only be captured for completed months

The 'Add Verification' modal in Company Overview now defaults to the previous month, and the month picker hides the current and any future months. The backend rejects current-month submissions with a clear error message: a month must be over before its EPV can be captured.
